

Why use a property manager?

Most experienced property investors use property management services. Why?
Because they **save you time** and **make you money!**

Property Management isn't just about collecting rent. **Our job is to ensure your property is always rented to the best possible tenants that will pay the best possible rent.** We pride ourselves in keeping the property well maintained, tracking expenses and income, and dealing with the legalities of leases and the rights of tenants.

Save Valuable Time

The most obvious benefit of hiring a property manager is saving you time. You don't have to take the hours out of your week to make phone calls, posting advertisements, interviewing & vetting prospective tenants, solving tenant issues, making appointments for maintenance and repairs, collecting rent, etc. When you hire us, what you do with all your new-found extra time is up to you!

Marketing & Advertising

Property investment is a very lucrative business. To succeed in this field of business, you must know and understand your market. In other words, **property managers are there to know how much your property is worth (as far as monthly rent is concerned) and who to pinpoint as the appropriate target market.** Hiring the right property manager can make you thousands of dollars each year, while requiring little-to-no involvement by you. This allows you to focus on your day-to-day life and let the money come to you!
